Hi Todd,

You are correct in your assessment of the site regulatory responsibilities. At this time there are not any compliance issues and over time they have been rare. There is a new Environmental Manager there now so hopefully things will continue to run smoothly.

Tim:

This is to inform you that I am the new EPA corrective action project manager for CECOS International (OHD 087 433 744), taking over for David Petrovski (retired). You should have received my letter (attached).

I've been reviewing the administrative record/files. There are groundwater monitoring and leachate collection reports coming in both to U.S. EPA and Ohio EPA. It appears that the post-closure RCRA units are being handled by the Ohio EPA (disposal units 4/5, 6, 7, 8, 9, and 10): while Cell 1/2, the intermediate landfill, Cell 3, and Cell 4/5 are covered by the U.S. EPA Final Decision Document and the 1994 3008(h) AOC. I'm reviewing the O&M Work Plan and Reports for the EPA corrective measures to identify any potential unresolved compliance issues.

Regarding the Ohio EPA post-closure units and the reporting requirements, please let me know if there are any outstanding compliance issues with the Facility.
